

PanelHush Press

Ceiling hung sound absorbing acoustic screen

PanelHush Acoustic Ceiling hung panels are a PET (Polyethylene terephthalate) materials and acoustic panels are effective in reducing room echo and reverberation by absorbing sound waves that bounce off hard surfaces such as walls, floors, and ceilings.

PET materials are often used as a core material in acoustic panels because they are lightweight and have good acoustic properties. PET materials are made from recycled plastic bottles, making them an eco-friendly option for acoustic treatment.

Acoustic panels work by absorbing sound waves that hit their surface. When sound waves hit a hard surface, they bounce back and forth, creating an echo and increasing reverberation in the room. This can make it difficult to hear speech clearly and can create an unpleasant listening environment. When acoustic panels are installed, the sound waves hit the panels and are absorbed, reducing the amount of sound that bounces back and reducing the amount of echo and reverberation in the room.

Acoustic Performance & Technical

Acoustic Absorber - Press Acoustic Screen - 12mm							
Frequency (Hz)	125	250	500	1000	2000	4000	NRC
Press 12mm	0.40	0.85	1.00	0.96	1.00	1.00	0.95

FIRE

PanelHush Press acoustic hung has been tested to EN 13501-1:2007+A1:2009 Fire classification of building products and building elements - Part 1: Classification using fire test reaction data, class B.

WEIGHT

The PanelHush Press Acoustic panel weighs 4.5kg/m².

CLEANING

Light dirt can be removed with a damp cloth. A small area should be tested before treating the rest to ensure the finish is not affected.

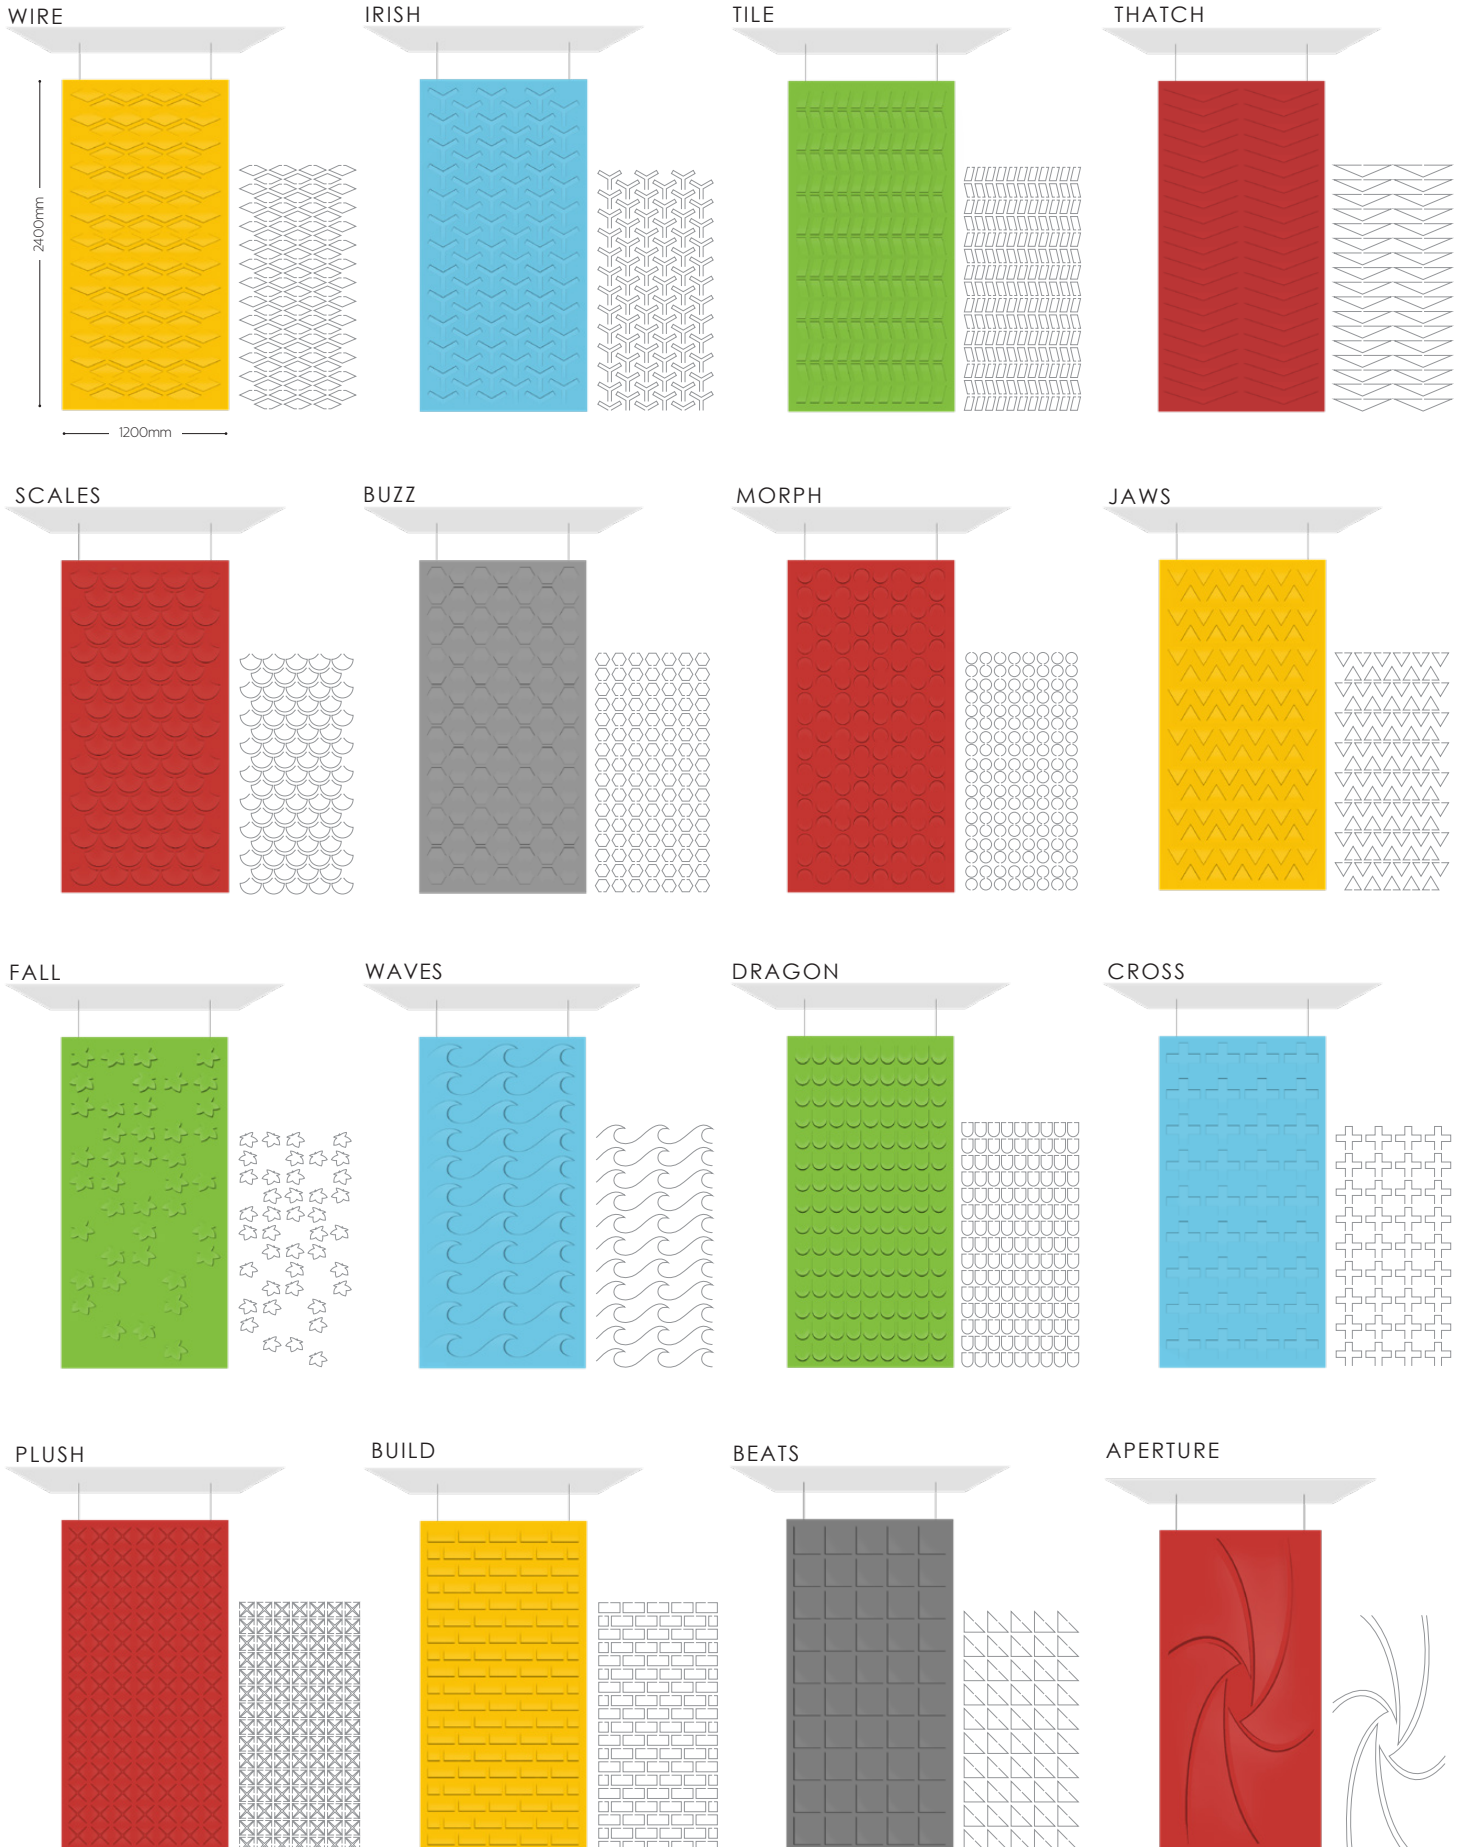

PanelHush Press Ceiling Hung Panels

The Press' acoustic pams are a simple way to decorate your workspace or personal space. You can do it how you want. With 16 standard colors to choose from, whether it's an office space or a children's play area, we'll have the right colour and design for you.

PanelHush's acoustic screen is ideal for any setting. You choose the design that you want to use and press it through the screen, this will create an effect that is three-dimensional for them. Our suspended screens are accompanied by the hanging equipment. Customized designs are available upon request.
